How Bizmitra AI (BAI) works, and how it handles your data.

What BAI does

Bizmitra AI answers questions over **your own** business data on your instruction.

Data handling

- Processed to answer your queries; **not** used to train shared models without consent
- AI personalization is consent-gated and withdrawable (with a short recovery grace)

Responsible use

AI output is assistive and may contain errors — verify before relying on it for decisions.
